**Read the passage and answer the questions that follow :**

India is a great country, any Indian can be proud of it. It has an Ancient and a rich Heritage. The Hindu scripts - the Upanishads, the Bhagavad-Gita, the Vedas and the great epics - the Mahabharata and Ramayana - teach how a man should conduct himself in all situations, at all places and at all times. Indians are spread all over the world and viewed in the right perspective an Indian has all the traits of a successful individual. But he is not in the limelight internationally. At crucial times, his skill is lacking. Be it in academics, politics, statesmanship or sports. Globally, his identity does not reverberate as that of the European, American, Japanese and Chinese. Economists harp on the lack of competitiveness among the Indian businessmen. There is no distinct "Indian management" which could become a 'benchmark' like that of American /Japanese management. The Indian's deeds do not get highlighted. An Indian is definitely not inferior, but is not among the best.

The main problem has been the country's population, lack of education among the masses and wrong prioritization in tackling economic issues. Indians as a group are not cohesive. There is a lack of 'co-ordination' among individuals, among groups - social, cultural, functional; among systems, institutions and States. This lack of co-ordination may be traced to selfishness, lack of trust and the inability to find joy in working together as a team for a common goal. This leads to divisiveness, looking for criticism, with the result images are tarnished and the main purpose defeated. This phenomenon is visible among the bureaucrats, the politicians, the intellectuals, the business community and the sports fraternity; all those who matter and who give a poor account of themselves as a group despite individual brilliance. This contrast in human behavior can perhaps be traced to age-old beliefs, religious intolerance, poverty and diversity in day-to-day living conditions. The socialistic system of governance, although good in concept, has not yielded the desired results in view of people's basic attitudes, absence of a work culture and ethics. Perhaps governance by a mixture of '-isms' could be the solution. If small doses of Capitalism, Socialism, Fascism, Nazism and Communism are administered depending upon the needs, it could perhaps lead to satisfactory governance. This mixture may be called Indianism.

India is capable of solving its own problems. As a nation, we have achieved self-sufficiency in food, the prime requirement for sustenance. The communication network has vastly improved. The infrastructure is now getting some attention. The power sector, production hitherto neglected, is being augmented. It will improve. Transportation - both rail and road - which is under consideration for improvement will also pick up. These achievements must be highlighted at the global level. They should be publicized in the underdeveloped and developing countries and more vigorously in the developed countries. Doordarshan snippets depicting national integrity are certainly helping the cause of Indianness within India. What is needed is a marketing strategy. India must be presented as a product, a quality to be projected on the global scene.
